

E-Commerce Sales Analysis

Dashboard Project Report

Prepared by: Nandani Kumari

Tool Used: Microsoft Excel

Dataset Source: Kaggle

Date: May 2026

About This Report

This report presents a complete data analysis of an e-commerce sales dataset containing over 31,000 orders. The analysis was performed using Microsoft Excel — including Pivot Tables, Charts, and an Interactive Dashboard with Slicers. The goal was to uncover sales trends, identify top-performing channels and categories, and understand customer buying behavior.

1. Project Introduction

What is this project about?

This project analyzes real-world e-commerce sales data to answer important business questions like: Which months have the highest sales? Which platform performs best? Which product category generates the most revenue? Who buys more — men or women?

Dataset Details

Parameter	Details
Source	Kaggle (Public Dataset)
Total Orders	31,237 orders
Total Revenue	Rs. 2,11,76,377
Time Period	January 2022 - December 2022
Sales Channels	Amazon, Flipkart, Myntra, Ajo, Meesho, Nalli, Others
Product Categories	Kurta, Set, Saree, Western Dress, Top, Ethnic Dress, Blouse, Bot
Key Columns	Order ID, Gender, Age Group, Month, Channel, Category, Amount

Objective

- Analyze monthly sales trends throughout the year 2022
- Identify which sales channel (Amazon, Flipkart, Myntra, etc.) contributes the most revenue
- Determine which product category sells the most by quantity and revenue
- Compare buying behavior between male and female customers
- Build an interactive dashboard for easy data exploration

2. Tools & Methodology

Tool Used: Microsoft Excel

All analysis was done in Microsoft Excel using the following features:

Excel Feature	Purpose	Where Used
Pivot Tables	Summarize large data quickly	All 4 analyses
Pivot Charts	Visualize summarized data	Bar, Pie & Clustered charts
Slicers	Interactive filtering by Month/Channel/Category	Dashboard
Conditional Formatting	Highlight important values	Data sheet
Remove Duplicates	Data cleaning	Raw data preparation
Format Cells	Fix date and number formats	Data cleaning step

Step-by-Step Process

Step 1 — Data Cleaning	Opened the CSV dataset in Excel. Removed duplicate rows using Data > Remove Duplicates. Fixed the Date column format using Format Cells > Date. Checked for blank/empty cells using Conditional Formatting.
Step 2 — Pivot Table Creation	Created 4 separate Pivot Tables: Monthly Sales (Month vs Amount), Channel Sales (Channel vs Amount), Category Sales (Category vs Amount & Qty), Gender Sales (Gender vs Amount).
Step 3 — Chart Building	Created charts from each Pivot Table — Bar Chart for monthly trends, Pie Chart for channel and gender distribution, Clustered Bar Chart for category comparison.
Step 4 — Dashboard Assembly	Created a new 'Dashboard' sheet. Copied all 4 charts onto this sheet. Arranged them in a clean 2x2 layout. Added a title 'E-Commerce Sales Analysis Dashboard'.
Step 5 — Slicers Added	Added interactive Slicers for Month, Channel, and Category. Connected all slicers to all charts so that clicking any filter updates all charts simultaneously.

3. Analysis & Key Findings

3.1 Monthly Sales Analysis

Figure 1: Monthly Sales 2022 — Bar Chart

Month	Revenue (Rs.)	Month	Revenue (Rs.)
January	18,20,601	July	17,72,300
February	18,75,932	August	18,08,505
March	19,28,066	September	16,88,871
April	18,29,263	October	16,66,662
May	17,97,822	November	16,15,356
June	17,50,966	December	16,22,033

Key Findings:

- March recorded the highest sales of Rs. 19,28,066 — possibly due to Holi season shopping
- Sales were consistently strong in the first half (Jan-Apr) compared to second half
- November had the lowest sales (Rs. 16,15,356) — surprisingly low despite festive season
- Total annual revenue: Rs. 2,11,76,377 across 31,237 orders

3.2 Sales by Channel Analysis

Figure 2: Sales by Channel — Pie Chart

Channel	Revenue (Rs.)	Share %
Amazon	75,19,933	35.5%
Myntra	49,41,540	23.3%
Flipkart	45,73,301	21.6%
Ajo	13,31,427	6.3%
Nalli	10,15,329	4.8%
Meesho	9,27,606	4.4%
Others	8,67,241	4.1%
Grand Total	2,11,76,377	100%

Key Findings:

- Amazon dominates with 35.5% of total revenue — the clear market leader
- Top 3 channels (Amazon, Myntra, Flipkart) together account for 80.4% of all sales
- Meesho and Nalli have smaller shares but still contribute meaningfully
- Business should prioritize Amazon & Myntra for maximum reach

3.3 Sales by Category Analysis

Figure 3: Sales by Category — Clustered Bar Chart

Category	Revenue (Rs.)	Qty Sold	Rank
Set	1,05,07,546	12,446	#1
Kurta	49,59,377	10,541	#2
Western Dress	31,48,836	4,084	#3
Top	11,86,199	2,201	#4
Saree	10,10,471	1,389	#5
Ethnic Dress	1,95,256	264	#6
Blouse	1,40,888	234	#7
Bottom	27,804	78	#8

Key Findings:

- Set is the top-selling category — Rs. 1.05 Crore revenue and 12,446 units sold
- Kurta is the second best — very popular in Indian fashion market
- Western Dress is third, showing growing demand for western wear
- Bottom and Blouse have very low sales — could be marketed more aggressively

3.4 Men vs Women Sales Analysis

The gender-wise sales analysis was done using a Pivot Table with Gender in Rows and Sum of Amount in Values. A Pie Chart was created to visualize the split.

Gender	Revenue (Rs.)	Share %
Women	1,37,64,645	65%
Men	74,11,732	35%
Grand Total	2,11,76,377	100%

Key Findings:

- Women account for 65% of total purchases — they are the primary customer segment
- Men contribute 35% — still a significant segment, especially for kurtas and western wear
- Marketing campaigns should be more focused on women customers
- Product assortment should prioritize women's fashion categories

4. Interactive Dashboard

A final interactive dashboard was created combining all 4 analyses on a single sheet. Slicers were added for Month, Channel, and Category — allowing users to filter all charts simultaneously with one click.

Figure 4: Final Interactive Dashboard with Slicers

Dashboard Component	Description
Monthly Sales Chart	Bar Chart showing month-wise revenue for all of 2022
Sales by Channel	Pie Chart showing Amazon, Flipkart, Myntra etc. contribution
Sales by Category	Clustered Bar Chart with Revenue and Quantity per category
Men vs Women	Pie Chart showing gender-wise purchase split (65% Women)
Month Slicer	Click any month to filter all charts for that month only
Channel Slicer	Click any channel to see its performance across all charts
Category Slicer	Click any category to filter all charts by product type

5. Conclusion & Business Insights

This project successfully analyzed 31,237 e-commerce orders and generated actionable business insights using Excel. Here is a summary of the most important conclusions:

Best Month	March 2022 — Rs. 19.28 Lakhs revenue
Top Channel	Amazon — 35.5% of total revenue (Rs. 75.2 Lakhs)
Best Category	Set — Rs. 1.05 Crore revenue, 12,446 units sold
Primary Customer	Women — 65% of all purchases
Weakest Month	November — Rs. 16.15 Lakhs (needs marketing push)
Growth Opportunity	Bottom & Blouse categories are underperforming

Recommendations

- Focus marketing budget on Amazon and Myntra as they drive 60% of revenue
- Run special campaigns in September-December to boost the lower-performing months
- Introduce more 'Set' category products as they are the top sellers
- Target women customers with personalized deals and offers
- Explore why November has low sales despite festive season — investigate further
